## ABOUT

New York City or basically New York is the most crowded city in the United States with an expected populace of 8,537,673 which is situated at the southern tip of the territory of New York. The city is the focal point of New York metropolitan region, a standout amongst the most crowded urban agglomerations on the planet.

New York City applies a huge effect upon business, fund, media, craftsmanship, form, investigate, innovation, training, and diversion. It is the home to the home office of the United Nations, and an imperative community for global strategy and has been portrayed as the social, money related, and media capital of the world. The most noteworthy point in the city is Todt Hill on Staten Island. The majority of New York City is based on the three islands of Long Island, Manhattan, and Staten Island. New York City includes a moist subtropical atmosphere.

New York City consists of five boroughs, each of which is a separate county of New York State. The five boroughs – Brooklyn, Queens, Manhattan, The Bronx, and Staten Island – were consolidated into a single city in 1898. All most 800 languages are spoken in New York, which makes it the most linguistically diverse city in the world. The city received a record 61 million tourists in 2016. Several sources have ranked New York the most photographed city in the world.
